

Pedro Aguirre  
Chairman & CEO  
Aguirre Corporation  
12700 Park Central Drive  
Floor 15  
Dallas, Texas 75251

January 24, 2008

To whom it may concern:

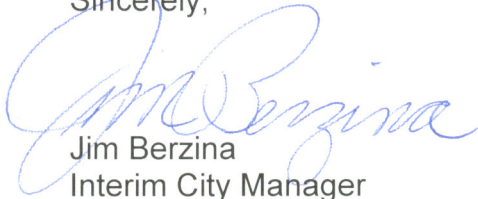

The City of Murphy, Texas has been involved with the architectural firm of Aguirre Corporation which is owned by Pedro Aguirre since approximately 2002 in the planning and building of a major municipal complex. That complex includes three buildings; a City Hall, a Police and Courts building and finally a headquarters' Fire Station. The total of the three building complex is in excess of 85,000 sq. ft. of buildings. The approximate cost was in the neighborhood of \$17 million dollars.

Mr. Aguirre and his firm provided the architectural design services for this complex and during the construction phase provided management control over the construction. The project was completed in 2005 and city staff occupied the buildings in the spring of that year. The staff experienced the thrill of totally modern facilities that were designed in such a way as to facilitate their being able to serve the public that we represent.

From the outside the building fit very nicely on the landscaped property that the City acquired to construct this complex. The buildings are attractive and help present an image of the City of Murphy being modern, up-to-date and ready to serve the public.

If I could provide any additional comments or information about this project, I or members of this staff will be happy to be available.

Sincerely,

Jim Berzina  
Interim City Manager
